

Undenatured type II collagen

SEMNL supplies a novel undenatured type II collagen derived from chicken sternum cartilage by Semnl patented low-temperature process. Semnl is the manufacturer in China which obtained license to produce undenatured type II collagen.

Suitable for:

- Dietary supplements
- Food
- Beverage

Mechanism: Oral immune tolerance

Undenatured type II collagen can be processed by antigen-presenting cells and presented by major histocompatibility complex to activate regulatory T cells in Peyer's patches (a group of gut-associated lymphoid tissues).
